You-R® FASHION

You-R[®] FASHION

You-R[®] OPEN based
Solution Modules for the
whole Apparel and Footwear
Supply Chain

Situation Today

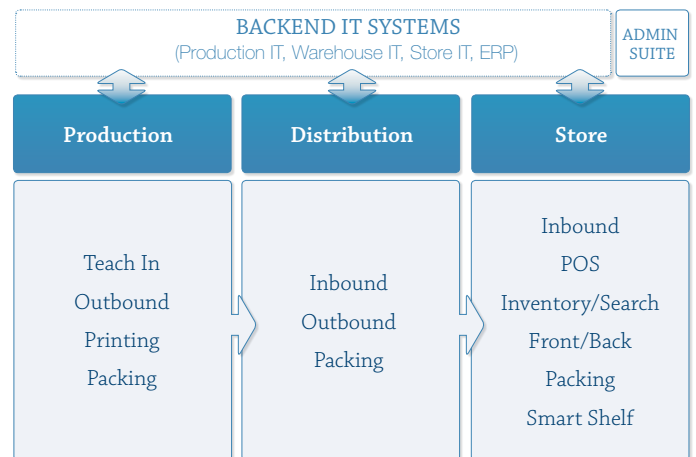

Fashion, Apparel and Footwear items are handled in a complex global supply chain. Due to color and size the number of Stock Keeping Units (SKU) is very high and leads to the requirement of precise item-oriented information.

Often companies suffer from inaccurate inventory, inaccurate forecast quality and a high level of manual handling, which in turn causes expensive errors and poor productivity. High costs in the supply chain, wastages, out of stock situation and counterfeiting call for action.

Solution

RFID automates the identification process on item level basis. Complete transparency in the total supply chain is achieved with minimum labor costs. RF-iT Solutions has developed field proven solution modules using EPC Gen2 within You-R[®] FASHION.

These modules support various process steps along the supply chain from the producer via DC's to store. Due to the integration power of You-R[®] OPEN a system integration partner is able to customise and integrate You-R[®] FASHION modules into their operative system. You-R[®] FASHION modules are already proven in projects and tested in RF-iT's EPC Global Test Center.

Customer Benefits

Higher Quality of the Supply Chain

- ▶ Increase of data and information accuracy
- ▶ Better supply chain transparency
- ▶ Stock accuracy
- ▶ Quick, reliable and permanent inventory in warehouse and store
- ▶ High in-store visibility

Increased Sales

- ▶ Better on shelf availability (OSA)
- ▶ Better tracking of goods (e.g. front - back store)
- ▶ Increased turnover
- ▶ Increased customer service

Cost Reduction

- ▶ Increased productivity
- ▶ Reduction of labor force
- ▶ Reduction of wastage, thievery, illicit trade
- ▶ Reduction of safety stock

Soft Benefits

- ▶ Higher customer satisfaction because of product availability and customservice
- ▶ Increased customer loyalty
